THE REPLY FILED 16 June 2005 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE.

1. ☒ The reply was filed after a final rejection, but prior to or on the same day as filing a Notice of Appeal. To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. The reply must be filed within one of the following time periods:

- a) ☒ The period for reply expires 1 months from the mailing date of the final rejection.
b) ☐ The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection.

Examiner Note: If box 1 is checked, check either box (a) or (b). ONLY CHECK BOX (b) WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).

Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

NOTICE OF APPEAL

2. ☐ The Notice of Appeal was filed on _____. A brief in compliance with 37 CFR 41.37 must be filed within two months of the date of filing the Notice of Appeal (37 CFR 41.37(a)), or any extension thereof (37 CFR 41.37(e)), to avoid dismissal of the appeal. Since a Notice of Appeal has been filed, any reply must be filed within the time period set forth in 37 CFR 41.37(a).

AMENDMENTS

3. ☐ The proposed amendment(s) filed after a final rejection, but prior to the date of filing a brief, will not be entered because
(a) ☐ They raise new issues that would require further consideration and/or search (see NOTE below);
(b) ☐ They raise the issue of new matter (see NOTE below);
(c) ☐ They are not deemed to place the application in better form for appeal by materially reducing or simplifying the issues for appeal; and/or
(d) ☐ They present additional claims without canceling a corresponding number of finally rejected claims.

NOTE: _____. (See 37 CFR 1.116 and 41.33(a)).

4. ☐ The amendments are not in compliance with 37 CFR 1.121. See attached Notice of Non-Compliant Amendment (PTOL-324).
5. ☐ Applicant's reply has overcome the following rejection(s): _____.
6. ☐ Newly proposed or amended claim(s) _____ would be allowable if submitted in a separate, timely filed amendment canceling the non-allowable claim(s).
7. ☐ For purposes of appeal, the proposed amendment(s): a) ☐ will not be entered, or b) ☐ will be entered and an explanation of how the new or amended claims would be rejected is provided below or appended.
The status of the claim(s) is (or will be) as follows:
Claim(s) allowed: _____
Claim(s) objected to: _____
Claim(s) rejected: _____
Claim(s) withdrawn from consideration: _____

DETAILED ACTION

Response to Arguments

1. This action is in response to papers filed on June 16, 2005.
2. Claims 1-25 are pending.
3. Claims 1-25 stand rejected.
4. Applicant's arguments filed June 16, 2005 have been fully considered but they are not persuasive.
5. As to applicants argument that Black fails to teach "sending and receiving" "to and from " an electronic apparatus examiner notes C.3 I. 55 –59 teaches a transponder and a reader for monitoring, locating and identifying. It is understood that if the equipment is identified it has to in someway communicate with the reader(via sending a signal) of which machine it is. It is further understood that reader then receives the information that is sent via the transponder. This constitutes two-way communication, the reader attempts to read the signal sent by the transponder, and the transponder sends the information to the reader in response to receiving the signal requesting identification from the reader.
6. As to applicants argument that information is not being updated via a signal being sent from the processing apparatus, thus the equipment that the reader and transponder are stored in fall within this scope. As claims the information processing apparatus can be anything that send information, therefore, in C. 4 I. 29-36 & 40–44 the transponder is activated to record information or annunciators and the transponder and reader provide information to a central processing system.

7. As to applicants arguments the cited reference Black does not teach writing product history information. Examiner notes writing is not positively recited rather is in the alternative with reading therefore examiner is only required to find one of those limitations not all. As to the updating aspect examiner draws applicants attention to C. 3 I. 12-15 in that information is being changed or updated that is store in regard to the electrical equipment.

8. As to applicants arguments that the secondary reference Clare is silent with respect to providing repair information the examiner again notes that repair information is not positively recited rather recited in the alternative with purchase information therefore the examiner is only required to find one limitation claimed.
